

Public Protection (food & safety)

Food Premises Inspection Report

Name of business:	The Stop Gap
Address of food business:	Mobile Catering Concession, Sovereign Way
Date of inspection:	22/10/2025
Risk rating reference:	25/00834/FOOD
Premises reference:	25/00245/FOOD
Type of premises:	Mobile takeaway
Areas inspected:	Main Kitchen
Records examined:	SFBB
Details of samples procured:	None
Summary of action taken:	Informal
General description of business:	Takeaway

Relevant Legislation

Food Safety Act 1990 (as amended)
Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)
Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013
Health and Safety at Work etc. Act 1974 and related regulations
Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law. You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

Compliance Area	You Score					
Food Hygiene and Safety	0	5	10	15	20	25
Structure and Cleaning	0	5	10	15	20	25
Confidence in management & control systems	0	5	10	15	20	30
Your Total score	0 - 15	20	25 - 30	35 - 40	45 - 50	> 50
Your Worst score	5	10	10	15	20	-
Your Rating is	5	4	3	2	1	0

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed.
(10)

Contamination risks

Contravention Food was not protected from general sources of contamination:

- same utensils i.e tongs were being used for raw and ready-to-eat foods
- utensils used for raw and ready-to-eat foods were being stored together

Legal Requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Information The FSA has issued guidance on controlling *E.coli* 0157 through:

- the complete separation of raw and ready-to-eat food
- the correct use of wash-hand basins and thorough hand washing

- having dedicated equipment (including complex equipment) for raw and ready-to-eat foods
- thorough 2-stage cleaning and the correct use of sanitisers
- and by controlling the risks posed by soil contaminated vegetables.

Visit: www.food.gov.uk for more information

Guidance If equipment and utensils (for example chopping boards, containers and tongs) are to be used for raw and RTE foods, they should be disinfected by heat or an adequate dishwasher cycle (able to reach 82°C for 15 seconds) between uses.

Guidance If adequate heat disinfection (such as a dishwasher or plunge sink) is not possible, separate equipment and utensils should be used for handling raw and RTE foods. Such equipment should be easily identifiable (colour coded) and must be stored and washed separately.

Hand washing

Contravention The following indicated that hand washing was not suitably managed:

- staff were not seen washing their hands when I visited
- no soap was available

Information Hand washing is required:

- before handling ready-to-eat food
- after touching raw food and its packaging, including unwashed fruit and vegetables
- after a break/smoking
- after going to the toilet
- after cleaning
- after removing waste
- after blowing your nose

Information Proper hand washing is essential in preventing the spread of E. coli 0157 and other harmful bacteria onto food and food contact surfaces. Proper hand washing must include the following steps:

- wet hands before applying soap
- good hand rubbing technique
- rinsing of hands
- hygienic drying

Information We have a hand washing kit which you might like to borrow in order to demonstrate the principles of correct hand washing to your staff. Contact the Duty Officer on email foodandsafetyteam@norwich.gov.uk for more information.

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- staff were not wearing suitable protective clothing

Legal requirement All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing

Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on foods:

- the bain-marie was not holding foods above 63°C
- open sauces were being stored at ambient temperatures

Legal Requirement If you rely on selling hot food (displayed under 63°C) within two hours you must be able to demonstrate your system for ensuring food is either sold, placed under refrigeration, or discarded, before the two hours have elapsed.

Recommendation It is a government recommendation that eggs are stored in the fridge

Information Sauces were noted stored at room temperature. The manufacture's recommendation is that such products are refrigerated once open

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(10)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- flooring underneath equipment

Observation The kitchen had been well maintained and the standard of cleaning was good.

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- container used for utensils
- seals to fridges/freezers
- underneath surfaces

Cleaning Chemicals / Materials / Equipment and Methods

Observation I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

Facilities and Structural provision

Observation I was pleased to see the premises had been well maintained and that adequate facilities had been provided.

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(10)**

Type of Food Safety Management System Required

Observation You were monitoring (and recording) the temperatures of your fridges and freezers.

Observation You were date labelling perishable foods appropriately and could demonstrate effective control over food spoilage organisms.

Food Hazard Identification and Control

Contravention You have not identified these food hazards or the methods of control at critical points in your operation:

- cross-contamination
- bacteria surviving in cooked food

Contravention The following Safer Food Better Business SAFE METHODS are incomplete:

- Acrylamide
- cleaning schedule
- suppliers list
- contacts list
- staff training list

Proving Your Arrangements are Working Well

Contravention You are not working to the following safe methods in your SFBB pack:

- personal hygiene / hand washing
- cross contamination/ physical or chemical contamination

Traceability

Observation Your records were such that food could easily be traced back to its supplier.

Training

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.
