

Public Protection (food & safety)

Food Premises Inspection Report

| | |
|----------------------------------|---|
| Name of business: | East Chinese Takeaway |
| Address of food business: | 86 Colman Road Norwich NR4 7EH |
| Date of inspection: | 13/01/2026 |
| Risk rating reference: | 26/00018/FOOD |
| Premises reference: | 24/00165/FD_HS |
| Type of premises: | Food take away premises |
| Areas inspected: | Storeroom, Main Kitchen |
| Records examined: | Temperature Control Records, Cleaning Schedule, Training Certificates/records |
| Details of samples procured: | None |
| Summary of action taken: | Informal |
| General description of business: | Chinese takeaway |

Relevant Legislation

Food Safety Act 1990 (as amended)
 Regulation (EC) No 178/2002 applied by The General Food Regulations 2004 (as amended)
 Regulation (EC) No 852/2004 and No 853/2004 applied by Regulation 19 (1) of the Food Safety and Hygiene (England) Regulations 2013
 Health and Safety at Work etc. Act 1974 and related regulations
 Food Information Regulations 2014

What you must do to comply with the law

The report may include **Contraventions** - matters which do not comply with the law. You must address all of the contraventions identified; failure to do so could result in legal action being taken against you.

As a guide, contraventions relating to cleaning, temperature control and poor practice, should be dealt with straight away.

Contraventions relating to structural repairs, your food safety management system and staff training, should be completed within the next 2 months.

Health and safety contraventions should be dealt with within 3 months unless otherwise stated.

To assist you the report may also include **Observations** of current practice, useful **Information, Recommendations** of good practice and reminders of **Legal Requirements**.

My inspection was not intended to identify every contravention of the law and only covers those areas, practices and procedures examined at the time of the inspection. If the report fails to mention a particular matter this does not mean you have necessarily complied with the law.

FOOD SAFETY

How we calculate your Food Hygiene Rating:

The food safety section has been divided into the three areas which you are scored against for the hygiene rating: 1. food hygiene and safety procedures, 2. structural requirements and 3. confidence in management/control procedures. Each section begins with a summary of what was observed and the score you have been given. Details of how these scores combine to produce your overall food hygiene rating are shown in the table.

| Compliance Area | You Score | | | | | |
|--|-----------|----|---------|---------|---------|------|
| Food Hygiene and Safety | 0 | 5 | 10 | 15 | 20 | 25 |
| Structure and Cleaning | 0 | 5 | 10 | 15 | 20 | 25 |
| Confidence in management & control systems | 0 | 5 | 10 | 15 | 20 | 30 |
| Your Total score | 0 - 15 | 20 | 25 - 30 | 35 - 40 | 45 - 50 | > 50 |
| Your Worst score | 5 | 10 | 10 | 15 | 20 | - |
| Your Rating is | 5 | 4 | 3 | 2 | 1 | 0 |

Your Food Hygiene Rating is 3 - a generally satisfactory standard

1. Food Hygiene and Safety

Food hygiene standards are generally satisfactory and maintained. There is evidence of some non-compliance with legal requirements. Some lapses are evident however generally you have satisfactory food handling practices and procedures and adequate control measures to prevent cross-contamination are in place. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(10)**

Contamination risks

Contravention The following exposed food to the general risk of cross-contamination with bacteria or allergens or its physical contamination with dirt, foreign objects or chemicals:

- food stored too close to the wash hand basin
- open food stored on the floor
- cutting boards were badly scored and need replacing
- jug stored in flour

Legal requirement At all stages of production, processing and distribution, food must be protected from any contamination likely to render it unfit for human consumption, injurious to health or contaminated in such a way that it would be unreasonable to expect it to be consumed in that state.

Hand washing

Contravention The following indicated that hand washing was not suitably managed:

- the wash hand basin was obstructed as washing up was stored in wash hand basin
- it takes a very long time for hot water to be produced at the wash hand basin

Personal Hygiene

Contravention The following are examples of poor personal hygiene or where it was made difficult for food handlers to maintain sufficiently high standards of personal cleanliness:

- protective clothing was insufficient to cover everyday clothes
- best hand-washing practices were not observed

Legal requirement All persons in food handling areas must wear suitable, clean, and where appropriate protective clothing

Information Regular hand washing is important for personal cleanliness. Remind all food handlers of the need to wash their hands before starting or returning to work, and specifically:

- after using the toilet;
- after handling rubbish;
- after smoking;
- after taking a break;
- after handling raw food

Temperature Control

Contravention The following evidence indicated there was a risk of bacteria growing on food:

- food i.e duck was being defrosted at ambient temperatures

Legal requirement Raw materials, ingredients, intermediate products and finished products likely to support the reproduction of pathogenic micro-organisms or the formation of toxins must not be kept at temperatures that might result in a risk to health.

Unfit food

Contravention The following food was unfit (and was seized or destroyed in my presence) because it was past its USE BY date:

- bean sprouts were being stored beyond the 'Use by' date of 12/1

Information High risk items have a use by date. After this date you must not sell, use or intend to use these foods. Make sure you have regular checks in place to remove out of date items

2. Structure and Cleaning

The structure facilities and standard of cleaning and maintenance are of a generally satisfactory standard but there are some repairs and/or improvements which are required in order for you to comply with the law. Pest control and waste disposal provisions are adequate. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(10)**

Cleaning of Structure

Contravention The following items were dirty and require more frequent and thorough cleaning:

- flooring behind and under equipment
- pipe work
- electrical wall sockets
- wall behind wok station

Cleaning of Equipment and Food Contact Surfaces

Contravention The following items are dirty and must be cleaned:

- lid to food container
- handle to food container
- electric fly killer
- seals to fridges/freezers

Cleaning Chemicals / Materials / Equipment and Methods

Observation I was pleased to see that the premises was kept clean and that your cleaning materials, methods and equipment were able to minimise the spread of harmful bacteria between surfaces.

Maintenance

Contravention The following had not been suitably maintained and must be repaired or replaced:

- tap indicators to wash hand basin
- split seals to fridge
- damage to freezer drawer front
- damage to plastic curtain to walk-in fridge

Facilities and Structural provision

Contravention The following facilities were inadequate or absent and must be provided or improved:

- the drainage is deficient

Pest Control

Observation I was pleased to see that the premises was proofed against the entry of pests and that pest control procedures were in place.

3. Confidence in Management

There are generally satisfactory food safety controls in place although there is evidence of some non-compliance with the law. The contraventions require your attention; although not critical to food safety they may become so if not addressed. **(10)**

Food Hazard Identification and Control

Contravention You have not identified these food hazards or the methods of control at critical points in your operation:

- bacteria growing on food

Contravention The food safety management system you have in place is not suitable given the food risks associated with your business. Implement Safer Food Better Business for Chinese Cuisine or an equivalent food safety management system.

Proving Your Arrangements are Working Well

Contravention The following are needed in order to demonstrate your food safety management system is working:

- cleaning schedule

Infection Control / Sickness / Exclusion Policy

Guidance UK Health Security Agency recommends that food handlers known or suspected to be suffering from a food-borne infection or gastrointestinal illness stay away from work until symptom-free for 48 hours.

Observation Policies were in place to prevent any infected food handler from contaminating food.

Waste Food and other Refuse

Observation You had measures in place to dispose of waste food appropriately and were employing the services of an approved waste contractor.

Training

Observation I was pleased to see that food handlers had been trained to an appropriate level and evidence of their training was made available.

Allergens in food

Observation You had identified the presence of allergens in your non-prepacked food and had brought this to the attention of your customers.
